60L Poly Water Roller

Simple, no fuss compaction

60L Poly Water Roller

Use this very simple 60L Lawn Roller/Compactor to compress your lawn to the right level. Operate the roller, by placing the unit on the lawn, filling it full of water, then pulling the roller along the lawn, flattening it to the right level.

Note: Unit is not designed for turning, simply flip handle and roll back the way you came (on a slight angle)

Features

- Lightweight (when unfilled)
- 25mm double bung system for quick emptying
- Steel handle and frame
- Impact resistant PVC roller

Applications

- Compressing lawn
