SPLIT LOCK ROLLER GUIDES

Available to suit conduit entries and or exits from 50mm through to 200mm these Split lock Roller Guides are ideal for heavier duty jobs when your cables are heavy/bulky etc. The full bearing roller makes it easier going for entry or exit from the conduit as well as protect the cable sheath from the conduit opening.

When inserted into the conduit opening you adjust the expansion screw to the required tension inside the conduit. This will hold the split lock roller guide firmly in place whilst the cable is in motion into or out of the conduit. The roller is situated offset to the conduit guide which provides you with different angle options.

Replacement full bearing alloy rollers to all sizes are available.

Code	Conduit size
SRG040	suits 50mm HD Electrical Conduit
SRG046	suits 50mm Telstra Conduit
SRG063	63mm
SRG080	80mm
SRG100	100mm
SRG125	125mm
SRG140	150mm
SRG200	200mm

The internal diameter of your conduit must exceed the SRG sizes listed above
