

IMPORTANT – NONE OF OUR WINCHES ARE DESIGNED TO LIFT OR HOIST MATERIAL. THEY ARE ONLY TO BE USED FOR HAULING PURPOSES.

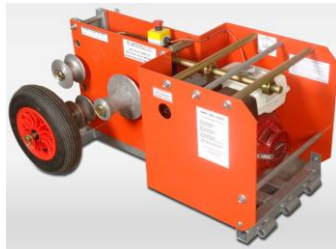

CAPSTAN WINCH

Petrol Winches

We offer 4 different size\style of Petrol Winches. Each winch has a different hauling rating. All our Petrol Winches are capstan winches and come with 2 different size capstans. The advantage of a capstan winch is you are not restricted in the length of your haul rope. All the winches can be adapted to allow a Crane Scale to be placed between the anchoring point and the Winch to allow for haul weights to be known.

1/2T Rated Winched

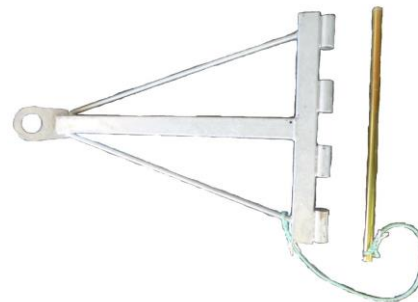

1T Rated Winch

2T Rated Winch

Fibre Optic Winch

A Frame Anchor

All of the above shown winches can be anchored using A Frame Anchor.

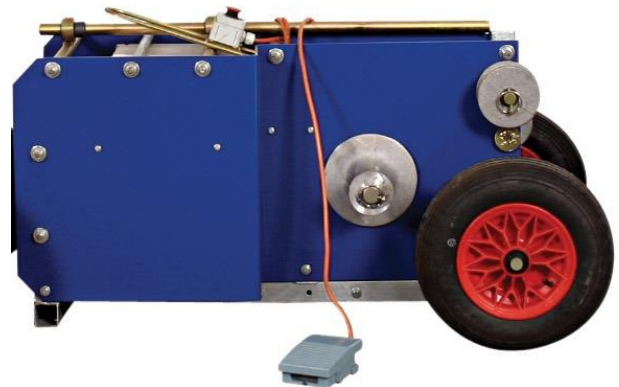

Code	Description	Shipping Dimensions	Weight
30340	1/2 Ton Rated Petrol Winch	1010x640x400mm	90kg
30341	1Ton Rated Petrol Winch	1200x750x550mm	150kg

30344	Fibre Optic Winch		
30345	Single Phase Electric Winch	1125x730x560mm	120kg
30346	Three Phase Electric Winch		
30359	2Ton Rated Petrol Winch	1300x800x650mm	160kg

Diesel Winch

Our Diesel Winch is 1T Rated and can be supplied with or without a Catalytic Converter fitted. The winch is ideal for working in areas where petrol engines are not recommended. This winch comes with 2 different size capstans and the engine is either pull or electric start.

1T Rated Diesel Winch

Electric Winch

Electric Winch

We offer either a 1ph or a 3ph Electric Winch. Both options are rated for approximately 300kg pull. Our Electric Winches are ideal for hauling indoors or in tunnels where fumes and noise are a factor. Single speed winch with forward and reverse, controlled by a foot pedal.
