

# CONCRETE CUTTING

## K535i DEMO SAW

 Husqvarna®

Model	K535i
Max Cutting Depth	76mm
Max Blade Size	230mm
Voltage	36V
Weight	4.2kg
Dimensions (LxWxH)	472mm x 252mm x 269mm

### Husqvarna K535i Battery Demo Saw

The K535i is a light-weight, battery powered saw for cutting concrete and masonry substrates. It's slim design and low weight make it easy to lift, control and manouvre increasing productivity and saving time on the jobsite.

The brushless motor is 25% more efficient than conventional brushless motors thanks to the revolutionary battery and brushless motor technology. This means the motor provides high and consistent torque without compromising battery performance. The same battery also powers a range of other equipment including, blowers, brush cutters, chainsaws and more.

Saw is sold as a skin only. Batteries and chargers can be purchased separately.
