Owners Manual for Operating Instructions and Parts List

LIFTPALHand Scissor Lift Table

Model TF30 • Capacity 300kgs Model TF50 • Capacity 500kgs

IMPORTANT

Owner and Operator MUST read and understand the operating instructions before using this Hand Scissor Lift Table

Thank you for using this lift table. Your lift table is made of high quality steel and is designed for the horizontal lifting and transport of loads on a level, fixed base. For your safety and correct operation, please carefully read this instruction before using it and keep it on file for future reference.

NOTE: All of the information reported herein is based on data available at the moment of printing. We reserves the right to modify our own products at any moment without notice and incurring in any sanction. So, it is suggested to always verify possible updates.

1. WARNINGS

- 1. DO NOT put foot or hand in scissors mechanism.
- 2. DO NOT allow other person to stand in front or behind lift table when it is moving.
- 3. DO NOT move lift table when table is in raised position. Load could fall down.
- 4. DO NOT enter under table.
- 5. DO NOT overload lift table. The state of midting vera seldential beolegy TOM Od .1
- 6. DO NOT put foot in front of rolling wheels, Injury could fall down. TOM-OULD
- 7. WATCH difference of floor level when moving lift table. Load could fall down.
- 8. DO NOT use lift table on slope or inclined surface, lift table may become uncontrollable and create danger.
- 9. DO NOT lift people. People could fall down and suffer severe injury.

2. CAUTION

1. Read this operation manual carefully and understand completely operating lift table. Improper operation could create danger.

MAXIMUM CAPAGITY

- 2. This lift table is a movable lifter designed to lift or lower rated load on table.

 DO NOT use lift table for other purpose than its intended use.
- 3. DO NOT allow person to operate lift table that dose not understand its operation.
- DO NOT lower table too fast. Load could fall down and create danger.
- 5. KEEP watching the condition of load. Stop operating lift table if load becomes unstable.
- 6. Braking lift table when sliding load on or off table.
- 7. DO NOT side or end load. Load must be distributed on at least 80% of table
- 8. DO NOT use lift table with unstable, unbalanced loosely load.
- Practice maintenance work according to service instructions.
- 10. DO NOT modify lift table without manufacturers written consent.
- 11. REMOVE load from table and use safety stopper to prevent table from lowering when servicing lift table.
- 12. This lift table is not designed to be water resistant. Use lift table under dry condition.

3. DAILY INSPECTION

Daily inspection is effective to find the malfunction or fault on lift table. Check lift table on the following points before operation.

- (1) Check for scratch, bending or cracking on the lift table.
- (2) Check if there is any oil leakage from the cylinder. A single gniff (sheft (4)
- (3) Check the vertical creep of the table.

- (4) Check the smooth movement of the wheels. alder ful aid prior for your shart
- (5) Check the function of brake to modernal bins priffil istnozing and not bengiesb
- (6) Check if all the bolts and nuts are tightened firmly and to be visited that

CAUTION: DO NOT use lift table if any malfunction or fault is found.

of printing, We reserves the right to modify our own produ

notice and incurring in any sanction, So, it is suggested to shard each of work. CAUTION: Brake lift when not moving it in order to prevent sudden movement.

The brake is equipped with the swivel caster on the right side.

- (1) Brake the wheel, press the brake pedal.
- (2) Release the brake, lift up the brake pedal.

4-2.Lifting the table, not seed position table is in raised position. [9]

WARNING

- 1. DO NOT overload lift table. Stay within its rated capacity.
- 2. DO NOT side or end. Load must be distributed on at least 80% of table area.

Press the lifting pedal several times until the table reaches the desired position. The table does not elevate after reaching the highest position even if the lifting pedal is pressed. The table lowers slightly after reaching the highest position. 9. DO NOT lift people. People could fall down and suffer severe injury.
