RISK ASSESSMENT INFORMATION

Operator Competency:		
Potential Hazard(s)	Risk Level	Control Measure(s)
Electric shock	Medium/Low	Disconnect machine when not in use. Check power chord for damage and safe placement prior to use. Never use machine in wet or damp conditions. Do not use machine when abnormal power conditions occur. Where extension leads are required – minimum wire diameter permitted – 1.0mm ² up to 25m length and 1.5mm ² up to 35m length.
Contact with moving parts	Medium/Low	Do not bend short lengths (<30cm). Keep body parts well clear of moving parts when operating machine. In particular, ensure hands are well clear of bending module/pin whilst operating machine. Always wear protective gloves when handling machine.

Product Safety Assessment Sheet

Contact with hot parts of the machine body	Medium/Low	Do not touch pump housing after us, always allow time to cool. Always wear protective gloves when handling machine.
Instability	Medium/Low	Hold bender firmly and maintain proper footing and balance. Do not use at heights. Machine could move during operation.
Exposure to ultraviolet radiation while working outdoors	Medium	Wear appropriate PPC to cover exposed skin and sunscreen
Customer Identified Risks		

FURTHER INFORMATION

Key Operating Instructions:	Always refer to user manuals and take note of warning labels on machines.
	Only use machine on prescribed bending range.
	Only use approved REO-MECH spare parts and accessories

Improper or irregular maintenance can be hazardous to the machine and the operator. Please ensure a regular maintenance schedule is maintained as per user manual. For any service issues outside of the user manual maintenance guide, contact HOPPT Australia before using machine.
